

Amendments to the Specification:

Please replace the abstract with the following:

~~One embodiment of the present invention provides a~~ A
multi-use move, lift, and support device is disclosed. The
device is made of a step ladder frame containing a
plurality of steps and a hand truck frame. At least one
hinge pivotally connects the step ladder frame to the hand
truck frame. An anti-wobble hook may be used to lock the
frames in a step ladder configuration. The hook is moved
in position by the force of gravity.
